MAXIMISE YOUR SUMMER SNAPS WITH A PHOTO CANVAS TO REMEMBER

London, 20 June 2004 – Summer is finally here and as more and more great moments are captured on film or digital camera – why not utilise your snaps to enjoy them even further. A contrado photo canvas is the ultimate way to remember a certain someone or a great night out and gives you personalised piece of art to hang on your wall. Visit www.contrado.co.uk to order a made to measure hand-stretched canvas, which can be delivered to your door within 7-14 days, giving you an affordable one off print that will last a life-time.

www.contrado.co.uk is a mail order company, where you can submit an image online or by post. These hand-stretched canvasses use high quality scanning technology bringing an image to life, which will transform your living space. The canvasses are custom made - so you identify your photo and wall hanging space and provide the dimensions for production. It makes sense to keep the shape of the photo to the shape of the canvas or cropping will be required. A range of sizes are available, up to 1.3m along one side and any dimension the other direction.

A free 'touch up' service is also available, therefore old or slightly damaged photos can be digitally enhanced. The canvasses are authentic and look and feel like fabric. They do not have a plastic coating. They are durable, and tests include machine washing (full cycle) five times with no colour change to the naked eye. Contrado provides a 1 year guarantee. The print is unlikely to fade with normal use, it can't be rubbed off and it will not flake or scratch off the surface like common canvas inkjet printing can.

-ENDS-
